CORTEZO, MARKY G. **MARCH 26, 2025**

BSIT 2-1 **COMP 009 – Object Oriented Programming**

Midterm Activity #4 – Grade Evaluation System

Program Requirements

1. Create a Java program named:

GradeEvaluationLastName

(Example: GradeEvaluationBedis)

2. Declare the following **fixed (hardcoded)** values inside main:

double prelim = 85;

double midterm = 78;

double finals = 90;

3. Compute the average grade using:

average = (prelim + midterm + finals) / 3;

Display Output

Your program should display:

- Prelim, Midterm, Finals grades
- Computed Average
- Grade Remark
- Grading Criteria (Use if-else only)

Average Range Remark

90 – 100 Excellent

80 – 89 Good

75 – 79 Fair

Below 75 Failed

Program Rules

Your program must use ONLY:

- ✓ Variables
- ✓ Arithmetic operations

- ✓ if-else statements
- ✓ (optional) switch-case for remark display

SOURCE CODE:

```
public class GradeEvaluationLastName {

    public static void main(String[] args) {

        // Hardcoded grade values
        double prelim = 85;
        double midterm = 78;
        double finals = 90;

        // Compute the average
        double average = (prelim + midterm + finals) / 3;

        // Determine the remark based on average
        String remark;

        if (average >= 90 && average <= 100) {
            remark = "Excellent";

        } else if (average >= 80 && average <= 89) {
            remark = "Good";

        } else if (average >= 75 && average <= 79) {
            remark = "Fair";

        } else {
            remark = "Failed";
        }

        // Display the results
        System.out.println("Prelim Grade: " + prelim);
        System.out.println("Midterm Grade: " + midterm);
        System.out.println("Final Grade: " + finals);
        System.out.printf("Average: %.2f%n", average);
        System.out.println("Remark: " + remark);

    } // end of main

} // end of class
```

Sample Execution:

```
<terminated> GradeEvaluationCortezo [Java Application] C:\Users\Mar
Prelim Grade: 85.0
Midterm Grade: 78.0
Final Grade: 90.0
Average: 84.33
Remark: Good
```
